PROFESSIONAL SUMMARY

Third-year BSc (Special) in Management Information Systems undergraduate at NSBM Green University with an excellent GPA of 3.96/4.00, demonstrating strong academic performance and commitment to continuous learning. A highly motivated and adaptable individual with proven leadership, communication, and teamwork skills, capable of thriving under pressure and delivering high-quality solutions within tight deadlines. Possesses strong software engineering knowledge with hands-on experience in backend engineering, Spring Boot, FastAPI, Java, RESTful APIs, and software testing, and is actively seeking an internship opportunity to further develop and contribute in software engineering, backend development, or full-stack development.

EDUCATION

BSc (Special) in Management Information Systems | NSBM Green University
2023 – 2027 | GPA: **3.96 / 4.00**
GCE Advanced Level — Physical Science Stream | D.S. Senanayake College, Colombo 07
Result: CSS
GCE Ordinary Level — 9 A's | D.S. Senanayake College, Colombo 07

TECHNICAL SKILLS

Backend: Spring Boot, Java, REST API Design, Spring Security, JWT Authentication
Testing : JUnit, Selenium WebDriver, PlayWright
Frontend: React, Next.js, Angular, Flutter (MVC), PHP, Tailwind CSS, HTML/CSS
Databases: MySQL, MongoDB, PostgreSQL (Begginer)
Tools & Platforms: IntelliJ IDEA, VS Code, PyCharm, Git, GitHub, Power BI, Cloudinary, Razorpay API, Docker, Redis(Begginer)

PROJECTS

Financial Manager Application | Spring Boot · React · JWT · MySQL · Cloudinary

- Developed a Spring Boot REST API for income and expense tracking, including category management, transaction history, dashboard analytics, and secure user-specific data access.
- Implemented JWT-based authentication with email verification for secure account activation and session management.
- Integrated Cloudinary for media storage. built responsive React frontend APIS for real-time financial data management.

<https://github.com/sadithaboxrec/Money-Manager-Web>

BookMart — Ecommerce Bookshop Backend | Spring Boot · MongoDB · JWT · Sessions · Razorpay

- Engineered a Spring Boot and MongoDB backend for an e-commerce bookshop, supporting product listings, seller workflows, shopping cart management, and checkout.
- Built a persistent guest-cart system using HTTP sessions and merged guest carts into user accounts after JWT-based login.
- Built seller dashboard with product image upload (Cloudinary) and order management APIs.
- Integrated and validated Razorpay payment gateway using test API keys. tested end-to-end checkout flow.

URL Shortener Platform | FastAPI · React · PostgreSQL · Redis · Docker

- Developed a scalable FastAPI REST API for URL shortening with unique short-code generation, secure redirection, click tracking, and user-specific URL management using PostgreSQL and SQLAlchemy Async.
- Implemented session-based authentication, guest and authenticated user access, Redis-powered rate limiting, and role-based usage restrictions to support anonymous and registered users with different service limits.
- Designed a modular backend architecture with Pydantic schemas, service layers, dependency injection, and asynchronous database operations, while integrating Dockerized deployment and a React frontend for URL management, QR code generation, and future analytics and premium features.

<https://github.com/sadithaboxrec/Url-Shortener-App>

AI Image Generator Web Application | Spring Boot · Stability AI API · REST

- Developed Spring Boot REST API integrating Stability AI to generate stylised images (Pixar-style) from text prompts and image.

<https://github.com/sadithaboxrec/AI-image-generator-web>

Project Management Web Application | Spring Boot · Angular · Spring Security · Tailwind CSS

- Built a project management application using Spring Boot and Angular with role-based access for Admin and Developer users.
- Implemented REST APIs for project creation, task assignment, status tracking, and reporting.

<https://github.com/sadithaboxrec/Task-Management-WebApplication>

Mental Healthcare Mobile Application | Flutter · Flask · MVC · AI Monitoring

- Built multi-role mobile app (patients, guardians, doctors) with mood tracking, real-time chat, and push notifications.
- Developed Flask web admin dashboard; integrated AI-based patient behaviour monitoring module.
- Gathered requirements directly in collaboration with 'Sumithrayo' suicide prevention organisation.

HACKATHONS & ACHIEVEMENTS

- **Winner** — NSBM TechMath Competition (2025)
- **2nd Place** — NSBM GreenXtreme Hackathon (2025)
- **Finalist (7th Island-wide)** — SLIIT Xtreme Hackathon 2025
- 21st Place — IIT Hackathon 2025 | Finalist — USJP Hackathon 2025 | Participated — Mora Hackathon 2025
- Ideathon 1.0 (NSBM Compuvate Association) — Pitched island-wide E-Card solution concept (2025)

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Association of Information Systems, NSBM | · Vice Treasurer (2025) · Executive Committee Member (2024–2025)

Hackathon Hub, NSBM | Volunteer Coordinator (2026–Present) · Faculty Coordinator (2025–2026) · Logistics, AlgoXplorer 1.0 (2024–2025), PlymHack international hackathon Program Lead (2025) UpsideDownCTF Finance Lead (2026)

Media Circle, D.S. Senanayake College | Treasurer (2020–2021)

DS Boxing, D.S Senanayake College | Advisor (2022-Present)

CERTIFICATIONS

- Agile Requirements Foundation — IIBA & LinkedIn (Jan 2025)
- Project Management Foundations — PMI & LinkedIn (Jan 2025)
- Business Analysis Foundation — IIBA & LinkedIn (Jan 2025)
- Python for Beginners — University of Moratuwa (2024)
- Python Essential Training - LinkedIn (2025)
- Web Design for Beginners & Foundations of Project Management — University of Moratuwa (2025)
- Introduction to Software Quality Assurance - University of Moratuwa (2026)
